ling that of male quartets, some even excelling.  
The first purpose in the organization of the Metropolitan Trio was to furnish the public with a really fine singing organization of male voices at a cost no greater than that of inferior quartets.

The organ chimes are a product of the Deagan foundries and the boys play many instrumental selections wholly on the chimes, while some of the finest parts of the program are when the voices and chimes blend in ideal harmony their playing singing numbers.

### NOTES FROM MIDVALLEY

Friday evening, Dec. 22, there was held in the Midvalley school house one of the best and most lively community parties held in this district in a long time past. It was conducted under the auspices of the Primary Association for the special benefit of the Primary children, though the parents were cordially invited, who also did much in a material way, as it was desirous to have them join in the festivities. After the opening exercises in which the children were the most prominent, a short pithy program was given and then the time turned over to games, readings singing, etc., and then Santa came in with a bag of apples and there was a lively scramble for them. Each child under ten years got a fine stocking filled with candy and nuts from a large tree standing in one corner of the room and decorated appropriately. In all there were present seventy-two souls and they who were unable to be present were remembered and something sent to them.

The well drillers on the Owens farm have struck it rich for the owner as they have encountered two different stratas of water in the one well that runs thirty gallons to the minute. They have moved further north a quarter of a mile and will no doubt get a larger flow. Mr. Owens is also planning to have a large pump well put down on the upper end of his farm which will insure him enough water to irrigate the greater part of his farm.

E. M. Owens is having an immense barn built on his property in order to take care of his sheep in the lambing season, and have his hay under cover. The work is being done by Messrs. Henry Mitchell and John

Brown of Parowan. Wish we had a few more such progressive men hereabout who have unlimited faith in the Midvalley section.

Geo. W. Esplin is having two large lambing and protection sheep sheds built on his property north of his farm home in this section and contemplates taking care of his sheep and lambs in an efficient manner, as the gentleman believes a much larger percentage of the lamb crop can be saved by proper methods of housing.

W. H. Grimshaw still has a big job of threshing at the Stevens Bros. farm, when the weather man will give us some weather wherein the work can be done economically. But the past week it has been out of the question as it has been too wet and foggy and the alfalfa seed will not thresh out while it is damp.

Hunter and Grimshaw are going into the hog business on a large scale as they now have several hundred and are acquiring more as fast as they can be taken care of. These gentlemen realize that there will be a big demand for all the hogs that can be raised, and it is a certainty that they can be raised here very profitably and of the finest quality. Another evidence of progressive faith in this part of the country.

Mrs. Adams, our school teacher, has gone for a short trip to California to visit with her sister. The people of Midvalley are well pleased with the lady's services and have found that she is an efficient instructor, the pupils having made excellent progress under her direction.

Dr. O. Anderson, one of Cedar's efficient and popular dentists, returned last week from Salt Lake

### TAXPAYERS' CONFERENCE

### WITH WASHINGTON

The following statement is issued by Collector of Internal Revenue James H. Anderson of the district of Utah:

To save themselves time and trouble, and, in many cases, unnecessary expenditures, taxpayers having business with the income tax unit of the Bureau of Internal Revenue at Washington and desiring conference with officials in connection therewith, are advised to ask for such conference in advance.

A number of taxpayers and representatives appear at the income tax unit without appointment, and ask immediate hearings. Frequently the conference cannot be held at once for the reason that the papers and in-

formation relating to the case must be assembled or the proper official may be otherwise engaged. The result is a delay of a day or two, and added cost to the taxpayer in the way of hotel bills, etc.

Requests for conference should be addressed to the Commissioner of Internal Revenue, Washington, D. C., together with a statement of all the facts in connection with the cases, and the purpose for which it is desired. The taxpayer will be informed by letter or telegram of the date appointed for the conference.
